Education

Thapar Institute of Engineering and Technology Aug 2023 – May 2027

B.E. Electronics and Communication Engineering (CGPA: 8.56/10)

Experience

Software Development Intern, Infonza Innovations June 2026 – July 2026

infonza.com – GTA Industries Product & Billing Management System (Client Project)

- Owned delivery of a production product management system for a client's catalog, pricing, and billing workflows
- Built Supabase/PostgreSQL catalog CRUD with drag-and-drop ordering and persistent multi-customer drafts
- Delivered searchable transaction history, custom pricing, and localized invoice and packing-slip PDFs

Projects

Scout – Agentic College Assistant May 2026

Python, LangGraph, LangChain, FastAPI, Next.js

- Designed tree-structured retrieval across 11 admission documents for more targeted question answering
- Built a LangGraph agent to reason across retrieved context and answer multi-step admission questions
- Developed an async FastAPI backend with real-time Server-Sent Events to the Next.js frontend

ResumeAI – AI-Powered Resume Builder SaaS July 2026 – Present

Next.js 16, TypeScript, PostgreSQL, Supabase, Clerk, Groq, Docker

- Integrated the Groq model API into Smart Assembly to select and assemble job-specific resume content
- Built authenticated REST APIs with PostgreSQL persistence and a config-driven resume form system
- Containerized production builds with Docker, health checks, and GitHub Actions validation

Shortly – Serverless URL Shortener Sep 2026

Python, AWS Lambda, API Gateway, DynamoDB, Terraform

- Built and deployed a serverless REST API with Terraform, API Gateway, three Python Lambda functions, and DynamoDB
- Added 22 unit and 4 live API tests with GitHub Actions CI; enforced least-privilege IAM and CloudWatch logging

Certification

Data Analytics Job Simulation – Deloitte (via Forage) Aug 2026

Completed practical tasks in data analysis and forensic technology.

Technical Skills

- **Languages:** Python, TypeScript, JavaScript, C++
- **AI & Agents:** LangGraph, LangChain, document retrieval, Groq model API
- **Backend & Data:** FastAPI, async APIs, REST APIs, PostgreSQL, Supabase, DynamoDB
- **Frontend:** Next.js, React, TypeScript, Tailwind CSS, Server-Sent Events
- **Testing & Deployment:** pytest, unit/API testing, Docker, GitHub Actions, AWS Lambda, CloudWatch, Terraform
